

**THE DEFENDER™ BLUE PAD** is a stiff, blue non-woven thin floor pad. The pad has an open surface configuration and a unique “crusty” feel due to grain being applied to the first few layers of the surface. The center of the pad is designed to soften the abrasion. THE DEFENDER™ BLUE PAD removes a minimum amount of finish and leaves a fine “haze free” scratch that is not visible through the new coats of finish. The scratch pattern is sufficient to abrade existing cured coatings in preparation of new coats of AQUADEFENDER™ WOOD FLOOR FINISH and most waterborne coatings. This pad is your perfect choice to abrade between coatings when using oil-modified finishes. THE DEFENDER™ BLUE PAD is aggressive for knock down grain raise and removes small amounts of “trash” from properly dried sealers and finishes. It is also safe for use on game line paints, large painted borders, and keys. DEFENDER™ BLUE PADS are available in many sizes.
